

Quality Policy of BIOIKS/BIOPROD*

Our quality goal is to design, manufacture and supply products and services according to customers' expectation and in accordance with regulatory requirements. Every department of the company has quality objective reviewed by the management.

This implies that:

- ⊕ we manufacture product that conform to product and process specifications, to international standards and good manufacturing practices,
- ⊕ we use feedback from customers regarding our products and services and the data of every intermediate production phase as inputs to continuous improvement,
- ⊕ we present our products and services in an ethical manner,
- ⊕ we will minimize the environmental impact of our operations.
